The length of cycle shown on the display or in this booklet is an estimation only and is calculated assuming standard working conditions. The actual duration can vary according to factors such as water temperature and pressure, the amount of detergent used, the amount and type of load inserted, load balancing and any wash options selected.

For all Test Institutes:

- 1) Test wash cycle in compliance with regulation EN 50229: set wash cycle 1 with a temperature of 60°C.
- 2) Long wash cycle for cottons: set wash cycle 1 with a temperature of 40°C.
- 3) Short wash cycle for cottons: set wash cycle 3 with a temperature of 40°C.

Specials wash cycles

Sport Intensive (wash cycle 8) is for washing heavily soiled sports clothing fabrics (tracksuits, shorts, etc.); for best results, we recommend not exceeding the maximum load indicated in the "Table of wash cycles".

Sport Light (wash cycle 9) is for washing lightly soiled sports clothing fabrics (tracksuits, shorts, etc.); for best results, we recommend not exceeding the maximum load indicated in the "Table of wash cycles". We recommend using a liquid detergent and dosage suitable for a half-load.

Sport Shoes (wash cycle 10) is for washing sports shoes; for best results, do not wash more than 2 pairs simultaneously.

Express Wash & Dry (wash cycle 13) was designed to wash and dry lightly soiled garments quickly. This cycle may be used to wash and dry a laundry load of up to 0.5 kg in just 35 minutes.

To achieve optimum results, use liquid detergent and pre-treat cuffs, collars and stains.
